

## **Science at Parrett and Axe CE VA Primary School - Our Intent**

At Parrett and Axe CE VA Primary school, we work tirelessly to ensure that, from the day they arrive to the day they leave, all pupils are provided with quality first teaching in science through a skills-based curriculum. Each year, we endeavour to build on previous knowledge and learning through quality-first teaching and a well sequenced curriculum. Pupils are given wide-ranging opportunities to explore scientific skills and concepts through a range of practical activities and research skills. The over-arching aim is for the pupils to leave primary school with key knowledge and able to think and work scientifically.
